## *Minimal Weatherization Project for Private Home Owners on the Bois Forte Reservation*

The Bois Forte Band has been awarded a small grant to afford labor to install minimal weatherization techniques on private homes on the reservation for those who have an Elder and/or Disabled Person in the home. It includes an inspection for cracks along window & door frames, and minimal repairs as needed using caulking, weather-stripping, and spray foam insulation. As time allows, the final touch will be the installation of plastic over windows so long as the weather still necessitates it.

We are looking to serve up to fifty (50) homes on both Nett Lake & Lake Vermilion Reservations. The project will be completed sometime between April & May, 2018.

Those already enrolled in Bois Forte's Elder & Disabled Maintenance Program are already eligible, however those in the program must contact the Housing office to sign up for this specifically. **If you wish to check your eligibility and/or sign up, please contact Kathleen Adams at the Housing office 218-757-3253 to complete a registration form.**
